

Easy Referral Process

Cork Medical's straightforward approach to paperwork ensures an efficient and stress-free referral process.

We take your patients needs very seriously and timeliness is always most important. We work quickly to obtain the necessary documentation so treatment can begin as soon as possible.

Insurance Specialists

Count on us to stay up-to-date on insurance guidelines.

We take care of the verification, pre-authorization, and insurance requirements for each patient.

Putting Patients First

Our priority is each patient's safety and needs.

Patients can trust our clinical staff and experienced technicians for timely delivery and thorough setup. We will spend as much time as is needed to make sure every patient is satisfied.

Negative Pressure Wound Therapy Pump

Qualifications

Pressure Ulcers (stage 3 or 4):

- The patient has been appropriately turned and positioned
- The patient has used a group 2 or 3 support surface if the pressure ulcer is on the posterior trunk or pelvis
- The patient's moisture and incontinence have been appropriately managed

Neuropathic (for example, diabetic) ulcers:

- The patient has been on a comprehensive diabetic management program
- Reduction in pressure on a foot ulcer has been accomplished with appropriate modalities

Venous insufficiency ulcers:

- Compression bandages and/or garments have been consistently applied
- Leg elevation and ambulation have been encouraged

Surgical Wound (Wounds encountered in an inpatient setting):

- All other post operative healing techniques have been attempted or documentation is needed to support the medical necessity for accelerated formation of granulation tissue which cannot be achieved by other available topical wound treatments

For all ulcers or wounds, the following components of a wound therapy program must include a minimum:

- The patient has a chronic stage 3 or 4 pressure ulcer neuropathic (for example, diabetic) ulcer, venous or arterial insufficiency ulcer, or a chronic ulcer present for at least 30 days
- Application of dressings to maintain a moist wound environment
- Debridement of necrotic tissue if present
- Evaluation of and provision for adequate nutritional status

Wound Dressing Supplies

Internal Wound Dressing Supply Team will assist with paperwork and ensure the right products are shipped based on insurance qualifications and guidelines.
